

Lab Final | Make Up

CSE 3120 Web Programming Lab | Section – 02

Create a simple web application using HTML, PHP, and MySQL with the following requirements.

You are given the following screenshot, what should be in the HTML form. In the HTML form there is an input field for Name, and Date. **It's not necessary to Apply CSS.**

The screenshot shows a web form with a title "Submit Your Information". Below the title, there is a label "Name:" followed by a text input field. Below that, there is a label "Date:" followed by a date input field. The date input field has a placeholder text "dd-----yyyy" and a small calendar icon on the right. At the bottom left of the form, there is a green button with the text "Submit".

Figure 1: The HTML Form

After you Input a Name, and Pick a Date, and Press the Submit Button, it will Store these data into a database named “**makeup**”. The database (**makeup.sql**) is given below, you can download it from the link below.

<https://drive.google.com/file/d/14mB0WxVaxrsHx1viVNH2IYU91tV2Rq90/view?usp=sharing>

In this database there is one table. The table name is “entries”. In this table, there are 4 columns id, name, date, and random_number.

id is the Primary Key.

Showing rows 0 - 2 (3 total, Query took 0.0002 seconds.)

`SELECT * FROM `entries``

Figure 2: The entries Table

random_number this one is generated by hashing the Name that you take during Input.

Basically you can use the below Php function to generate the random number

```
$random_number = hash('sha256', $name);
```

Your Task

- Connect the .sql file into MySQL Database.
- Design the HTML form
- Send the instructed data, into the entries table. Just send the data to database using HTML form, by using Backend Programming (Example: php).

You can use W3Schools, Existing Lab Codes.
